

ReadingWise

Average impact when
measured by NGRT:
12.9 months

About ReadingWise

ReadingWise is an online, personalised reading intervention. It harnesses a range of techniques to deliver a rapid increase in reading proficiency in the shortest possible time. Associated benefits include improved behaviour and engagement.

Teaching assistants are trained and work with groups of 10 pupils in regular, 20-minute sessions. Since 2015 over 20,000 pupils in UK schools have completed the programme. A number of studies have examined the programme, including a Cambridge University study and a government funded study, 'Closing the reading attainment gap by increasing the effectiveness of teaching assistants', which found ReadingWise improved reading 78% faster than usual classroom teaching.

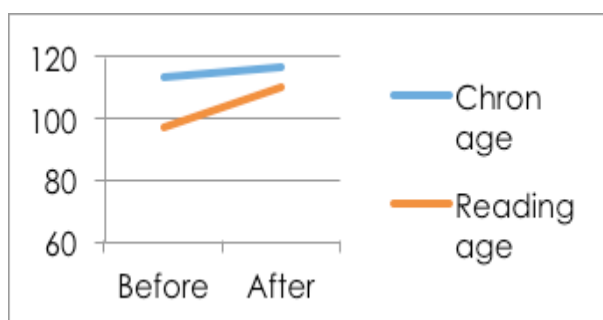

GL NGRT DATA

An extract of ReadingWise data where pupils had pre and post NGRT assessments (n = 293) showed the following impact:

Average Impact	12.9m
Average age at start	9.4yrs
Average age at end	9.7yrs
Reading gap at start	25.7m
Reading gap at end	16.9m
Ave time on programme	10h 19m

Closing the Reading Gap

The chart, below, shows the reading gap closing over time within this cohort of NGRT-assessed pupils. Over one term, the gap has closed from almost 26 months to just under 17 months.

The Secondary School - Year 7

"ReadingWise offers us a way to close the gap as pupils move from primary to secondary, and I think crucially within the school, it offers us a way to close the gap as they progress through the year groups."

Ben Davis, Head, St Ambrose Barlow

The Inner City Primary

"ReadingWise has been like a sprinkle of magic reading dust that has miraculously, through repetition, empowered this child to be able to read with fluency and confidence, with his head held high!"

Cheryl Meyrick, Deputy, Brookfield Primary
